### DECIDUOUS TREES & SHRUBS

Species & Size	Quantity	Cost
Black Cherry 12-18"	_____	_____
Buttonbush 10-18"	_____	_____
Juneberry 6-18"	_____	_____
Red Maple 12-18"	_____	_____
Sugar Maple (The NYS Tree) 12-18"	_____	_____
Sweet Gum 12-18"	_____	_____
Sycamore 12-18"	_____	_____
White Birch 12-18"	_____	_____
White Oak 18-24"	_____	_____

### PACKETS (Prices Vary)

	Quantity	Cost
<b>Edible Fruit</b> (2 each – Blackberry, Blueberry-Jersey, Blueberry-Blue-ray, Raspberry, Strawberry)	\$30 _____	_____
<b>Evergreen</b> (2 each – Balsam Fir, Colorado Blue Spruce, Fraser Fir, White Pine, White Spruce)	\$25 _____	_____
<b>Native Flowering</b> (2 each – Eastern Redbud, Elderberry, Juneberry, Red Osier Dogwood, White Flowering Dogwood)	\$25 _____	_____
<b>Native NY Wildlife</b> (2 each – American Hazelnut, Black Cherry, Juneberry, Red Osier Dogwood, White Pine)	\$25 _____	_____
<b>Nut Tree</b> (2 each—Burr Oak, Pin Oak, Red Oak, Sawtooth Oak, White Oak)	\$25 _____	_____
<b>Pond Habitat</b> (2 each – Buttonbush, Red Osier Dogwood, River Birch, Sycamore, Willow)	\$25 _____	_____

### SUPPLIES (Tax Included)

	Quantity	Cost
Fluorescent Pink Marking Flags	10/\$2, 100/\$15 _____	_____

**GRAND TOTAL \$ \_\_\_\_\_**

All species are bare rootstock. Species subject to change without notice. The District reserves the right to refund payment for species if unavailable. The District will NOT be responsible for the success or failure of plantings.

Orders with payment must be placed by **March 3**

Enclose check payable to **Ontario County SWCD**

#### PICK-UP TIMES/DATES:

In compliance with New York State Sales and Use Tax Regulations, 20 NYCRR, Section 529.2(c) - All trees and shrubs are to be used for effective conservation practices such as windbreaks, soil erosion control, etc. and will not be planted for ornamental purposes. Trees and shrubs sold will not be removed with roots attached for resale.

# 2023 TREE & SHRUB DESCRIPTIONS

**AMERICAN HAZELNUT** – *Corylus americana* The American Hazelnut is a multi-stemmed shrub with a rounded top and an open, often wide-spreading base. Grows to maximum height of 15–18' and a spread of 10–12' at maturity. It bears, in 2-3 years, an abundant crop of small, sweet tasting nuts. The nuts are easy to crack and drop free of the husk when mature. Excellent wildlife food source.

**BALSAM FIR** – *Abies balsamea* One of the more important conifers in the northern United States. Small to medium-sized, steeple-shaped tree with upright cones. Wildlife food and shelter source.

**BLACK CHERRY** – *Prunus serotina* Grows up to 50' tall. Pendulous branched tree with profuse white flowers in Spring with good Fall color. Mature trunk has 'burnt potato-chip' bark exposing reddish underbark. The fruits are usually devoured by birds/wildlife. Grows best in rich, moist, well-drained soil/full sun.

**BURR OAK** – *Quercus macrocarpa* Large distinguished oak with deeply furrowed bark and leathery lobed leaves resembling a bass fiddle. Acorn is easily identifiable by unique 'mossy' feathery sheath. Tolerant of a variety of moisture and soil conditions. Adapts well to urban settings. Native that prefers full sun. Grows 70-80'.

**BUTTONBUSH** – *Cephalanthus occidentalis* Deciduous shrub with an open-rounded habit that grows 6-12' tall. Easily grown in moist, humusy soils in full sun to part shade. Grows very well in wet soils, including flood conditions and shallow standing water. Flower heads are very attractive to bees and butterflies.

**COLORADO BLUE SPRUCE** – *Picea pungens* Grows up to 100'. Will reach 6' in 8-9 years, starting with a 3-year seedling. Its stiff, silvery-blue to bluish-green needles are 1" long. A handsome tree in a single planting or as a dense colorful screen or windbreak spaced 6' apart. Well-drained soil with good moisture and full sun.

**CONCOLOR FIR** – *Abies concolor* Grows up to 50'. A beautiful and easy to care for evergreen. Ashy gray trunk and silver foliage. Holds needles best of any short-needle tree. Requires good drainage.

**EASTERN REDBUD** – *Cercis canadensis* A small, irregular shaped, deciduous tree, strikingly conspicuous in the spring as the pink to reddish purple flowers form before the leaves. Grows on a variety of sites, best on moist, well-drained soils. Flat, small reddish-brown fruit pods persist throughout winter unless eaten by wild birds or other animals.

**ELDERBERRY** – *Sambucus canadensis* 5-12' multi-stemmed shrub. In mid June it has white flowers and in mid-August it has purple fruit when ripe, eaten by many species of birds. Elderberry tolerates most soils and roadside conditions.

**FRASER FIR** – *Abies fraseri* Shiny, green foliage is lighter on the underside. Has delightful fragrance and attractive purplish cones. Fabulous specimen that requires good drainage.

**JUNEBERRY** – *Amelanchier canadensis* Large shrub, excellent native. Fancy white flowers in April, followed by fruit in July. Tolerates full sun/partial shade, harsh climates and alkaline soils. Good bird/wildlife food source and erosion control.

**PIN OAK** – *Quercus palustris* Fast growing (for an oak) native, 75' tall, 40' wide, pyramidal shaped with resilient branches that can withstand high winds and ice storms. Red leaves in fall and held into winter. Small acorns are excellent wildlife food source for deer, squirrel, turkey and wild birds. Full sun and a wide range of soil types including wet soils.

**RED MAPLE** – *Acer rubrum* Medium-sized (20-60') tree with opposite branching and green to flaming orange fall leaf color.

**RED OAK** – *Quercus rubra* A large symmetrical tree, 60-70'. Acorn cup is flat and saucer-like. Tolerates full sun and polluted environments. Sandy soils.

**RED OSIER DOGWOOD** – *Cornus sericea* Geographically widespread native shrub with unique deep red stems, creamy white spring flowers, white fruit and maroon fall leaves. Excellent for reestablishing moist sites and stabilizing eroding streambanks. Wildlife food source for numerous species.

**SAWTOOTH OAK** – *Quercus acutissima* Produces large acorns in 7-10 years. Fast growing but small tree with a wide crown. A good wildlife tree and shade tree. 40-60' in height.

**SUGAR MAPLE** – *Acer saccharum* The official New York State Tree. Grows up to 75'. Offers good shade in the summer and brilliant scarlet-orange foliage in the autumn. Provides maple sugar products. Thrives in well-drained soil. Full sun, but will tolerate some shade.

**SWEET GUM** – *Liquidambar styraciflua* Unique star-shaped leaves, nearly compact crown, interesting fruit and twigs with unique corky growths called wings. An attractive shade tree. Beautiful shades of yellow, orange, red, and purple in autumn.

**SYCAMORE** – *Platanus occidentalis* Very fast growing hardwood that is long lived and reaches 100-140' in height. Best on creek bottoms or low slopes. Good on most sites except swamps or dry sand hills. Requires direct sunlight.

**WHITE BIRCH** – *Betula papyrifera* Grows up to 50' tall. Open green foliage. Grows best in cool, moist locations. Tolerates fairly wet locations. Pendulous, graceful branches and snow-white bark. Bark turns white in 4-6 years. Plant 3-4 seedlings together to create clump effect.

**WHITE FLOWERING DOGWOOD** – *Cornus florida* Grows 20-30'. Beautiful leaf color in the fall and showy white flowers April-May. Red fruit through late December.

**WHITE OAK** – *Quercus alba* A tall, noble tree that grows well in most soil types. Acorns provide for an important and diverse wildlife food source. Important native.

**WHITE PINE** – *Pinus strobus* Grows up to 100' tall. Moderate growth with good needle retention. Soft, flexible, green needles in groups of 5. Grows best in moderately-well drained soils. Great for mixed windbreaks or screens.

**WHITE SPRUCE** – *Picea glauca* Grows up to 90' tall reaching 6' in 7-8 years beginning with a 3-year seedling. Its stiff needles are light bluish-green, usually 1" long. Thrives in full sun and well-drained soil. Hardy and will live where other varieties will not.
