

2025 TREE & SHRUB PROGRAM

ONTARIO COUNTY SOIL & WATER CONSERVATION DISTRICT
480 NORTH MAIN STREET, CANANDAIGUA, NY 14424 (585)396-1450
WWW.ONTSWCD.COM

Trees and shrubs must be ordered in quantities listed or in multiples of those listed. Call for quantities over 300.

ALL SPECIES IN LIMITED QUANTITIES

CONIFEROUS TREES

Species & Size	Quantity	Cost
Colorado Blue Spruce 9-15" _____		
Concolor Fir 12-18" _____		
Eastern White Cedar/Arborvitae 18-24" _____		
Fraser Fir 9-12" _____		
White Pine 6-12" _____		
White Spruce 9-15" _____		

DECIDUOUS TREES & SHRUBS

Species & Size	Quantity	Cost
Black Cherry 12-18" _____		
Black Chokeberry 18-24" _____		
Buttonbush 10-18" _____		
Shagbark Hickory 6-12" _____		
Sugar Maple 12-18" _____		
Swamp White Oak 12-18" _____		
Sycamore 12-18" _____		
White Birch 12-18" _____		
White Flowering Dogwood 12-18" _____		
White Oak 12-18" _____

In compliance with New York State Sales and Use Tax Regulations, 20 NYCRR, Section 529.2(c) - All trees and shrubs are to be used for effective conservation practices such as windbreaks, soil erosion control, etc. and will not be planted for ornamental purposes. Trees and shrubs sold will not be removed with roots attached for resale.

2025 TREE & SHRUB DESCRIPTIONS

AMERICAN CRANBERRY – *Viburnum trilobum* When mature, an 8-12' multi-stemmed shrub with clusters of white flowers in May. Bright red fruit attracts birds September-February. A good specimen for a wetland planting, screen or for wildlife.

AMERICAN HAZELNUT – *Corylus americana* The American Hazelnut is a multi-stemmed shrub with a rounded top and an open, often wide-spreading base. Grows to maximum height of 15–18' and a spread of 10–12' at maturity. It bears, in 2-3 years, an abundant crop of small, sweet tasting nuts. The nuts are easy to crack and drop free of the husk when mature. Excellent wildlife food source.

BALSAM FIR – *Abies balsamea* One of the more important conifers in the northern United States. Small to medium-sized, steeple-shaped tree with upright cones. Wildlife food and shelter source.

BLACK CHERRY – *Prunus serotina* Grows up to 50' tall. Pendulous branched tree with profuse white flowers in spring with good fall color. Mature trunk has 'burnt potato-chip' bark exposing reddish underbark. The fruits are usually devoured by birds/wildlife. Grows best in rich, moist, well-drained soil/full sun.

BLACK CHOKEBERRY – *Aronia melanocarpa* A native upright, spreading, 8'x 8' suckering, multi-stemmed shrub with white flowers, green glossy leaves in summer and orange and red leaves in fall. Full sun to partial shade and tolerates wet soils.

BLACK WALNUT – *Juglans nigra* A tall tree (50-100') with alternate, narrow, toothed leaflets when crushed are spicy-scented. One of the most valuable and beautiful native deciduous trees. Fruit eaten by various wildlife. Moist soils.

BURR OAK – *Quercus macrocarpa* Large distinguished oak with deeply furrowed bark and leathery lobed leaves resembling a bass fiddle. Acorn is easily identifiable by unique 'mossy' feathery sheath. Tolerant of a variety of moisture and soil conditions. Adapts well to urban settings. Native that prefers full sun. Grows 70-80'.

BUTTONBUSH – *Cephalanthus occidentalis* Deciduous shrub with an open-rounded habit that grows 6-12' tall. Easily grown in moist, humusy soils in full sun to part shade. Grows very well in wet soils, including flood conditions and shallow standing water. Flower heads are very attractive to bees and butterflies.

COLORADO BLUE SPRUCE – *Picea pungens* Grows up to 100'. Will reach 6' in 8-9 years, starting with a 3-year seedling. Its stiff, silvery-blue to bluish-green needles are 1" long. A handsome tree in a single planting or as a dense colorful screen or windbreak spaced 6' apart. Well-drained soil with good moisture and full sun.

CONCOLOR FIR – *Abies concolor* Grows up to 50'. Beautiful and easy to care for evergreen. Ashy gray trunk and silver foliage. Holds needles best of any short-needle tree. Requires good drainage.

EASTERN REDBUD – *Cercis canadensis* A small, irregular shaped, deciduous tree, strikingly conspicuous in the spring as the pink to reddish purple flowers form before the leaves. Grows on a variety of sites, best on moist, well-drained soils. Flat, small reddish-brown fruit pods persist throughout winter unless eaten by wild birds or other animals.

EASTERN WHITE CEDAR – *Thuja occidentalis* Also called arborvitae, can reach 6' in 10-12 years from a 3-year seedling. Evergreen foliage is scale-like and flat. Grows in well-drained soil and also does well in swampy areas and alkaline soil. Full or half-day sun. Pyramidal in growth and well suited for windbreaks planted 4' apart.

FRASER FIR – *Abies fraseri* Shiny, green foliage is lighter on the underside. Has a delightful fragrance and attractive purplish cones. A great specimen that does require good drainage.

NINEBARK – *Physocarpus opulifolius* 5-9' deciduous shrub with showy white flowers in May-June and red fruit in mid-September. Very distinctive peeling bark. Tolerates most soils and full sun.

RED OAK – *Quercus rubra* A large symmetrical tree, 60-70'. Acorn cup is flat and saucer-like. Tolerates full sun and polluted environments. Sandy soils.

RED OSIER DOGWOOD – *Cornus sericea* Very geographically widespread native shrub with unique deep red stems, creamy white spring flowers, white fruit and maroon fall leaves. Excellent for reestablishing moist sites and stabilizing eroding streambanks. Wildlife food source for numerous species.

SAWTOOTH OAK – *Quercus acutissima* Produces large acorns in 7-10 years. Fast growing but small tree with a wide crown. A good wildlife tree and shade tree. 40-60' in height.

SERVICEBERRY – *Amelanchier laevis* Large shrub, excellent native. Fancy white flowers in April, followed by fruit in July. Tolerates full sun/partial shade, harsh climates and alkaline soils. Good bird/wildlife food source and erosion control.

SHAGBARK HICKORY – *Carya ovata* A member of the walnut family, the Shagbark Hickory thrives in humid eastern North America. The hardy tree grows in a variety of soils including clay, slightly acidic soils and loam. A fairly slow growing tree that can reach 100' and live hundreds of years. Valuable food source.

SUGAR MAPLE – *Acer saccharum* The official New York State Tree. Grows up to 75'. Offers good shade in the summer and brilliant scarlet-orange foliage in the autumn. Provides maple sugar products. Thrives in well-drained soil. Full sun, but will tolerate some shade.

SWAMP WHITE OAK – *Quercus bicolor* Grows in rich, deep, moist to wet, poorly-drained, acidic soils in full sun. A broad, rounded crown and a short trunk typically to 50-60'. Acorns mature in early fall. Best along streams, ponds, valleys, floodplains and the edge of wetlands. Good drought resistance. Usually has crimson shades of fall color.

SYCAMORE – *Platanus occidentalis* Very fast growing hardwood that is long lived and reaches 100-140' in height. Best on creek bottoms or low slopes. Good on most sites except swamps or dry sand hills. Requires direct sunlight.

WHITE BIRCH – *Betula papyrifera* Grows up to 50' tall. Open green foliage. Grows best in cool, moist locations. Tolerates fairly wet locations (along water). Pendulous, graceful branches and snow-white bark. Bark turns white in 4-6 years. Plant 3-4 seedlings together to create clump effect.

WHITE FLOWERING DOGWOOD – *Cornus florida* Grows 20-30'. Beautiful leaf color in the fall and showy white flowers April-May. Red fruit through late December.

WHITE OAK – *Quercus alba* A tall, noble tree that grows well in most soil types. Acorns provide for an important and diverse wildlife food source. Important native.

WHITE PINE – *Pinus strobus* Grows up to 100' tall. Moderate growth with good needle retention. Soft, flexible, green needles in groups of 5. Grows best in moderately-well drained soils. Great for mixed windbreaks or screens.

WHITE SPRUCE – *Picea glauca* Grows up to 90' tall reaching 6' in 7-8 years beginning with a 3-year seedling. Its stiff needles are light bluish-green, usually 1" long. Thrives in full sun and well-drained soil. Extremely hardy and will live where other varieties will not.
